Our preference is to have TCEQ make the call on if a BWN is rescinded based on your requirements.

Also, I just completed a comparison of "CLEAR" status in Response Manager versus what is the current "Rescinded" PDF on the TCEQ website. There are 58 water systems in your PDF that are now clear that are not marked clear in RM.

We do have data entry support here who can enter a new record in RM to mark all those CLEAR along with the other rescission info in the PDF if you like.

Thanks,

Mark

Subject: RE: M6H1 – Harvey Response: Hunter's Village Subdivision BWN

Our records indicate that we were notified via e-mail from the operations company that the BWN was issued and rescinded as you describe. We have not received sample results to substantiate this information.

Let us know if you'd like us to reach out an request the bac-T results.

Subject: M6H1 – Harvey Response: Hunter's Village Subdivision BWN

We have a site assessment where the operator at Hunter's Village Subdivision (TX1013159) said he issued a BWN on 8/28 and rescinded it on 9/8.

We do not see this in the PDFs on the TCEQ website. We can enter the assessment into RM with the issued and rescinded dates and an Op Status of CLEAR based your confirmation that TC- results have been received. Absent that, we can add it as "RESULTS" or some other status based on your findings.

Thanks,
